WELCOME TO OUR PRACTICE

Our office policy for new patients includes:

- Complete the enclosed health history form, and bring along to your appointment scheduled for _____.
- Allow at least 90 minutes for your appointment
- X-rays will be taken at this appointment, we do a complete set to determine cavities, cysts, bone loss or any infections - if you've had any x-rays at a previous dentist or oral surgeon please bring along to this appointment. You must call your previous dental office to inquire about your xrays. **Please request a copy of your full mouth series from your former dental office if it is less than 5 years old.** Dental insurance limits the frequency of full mouth series xrays and will only pay for them anywhere from 3-5 years. If you choose not to call your previous dental office, you must call your insurance company **PRIOR** to your new patient appointment to see if you are eligible for a new full mouth series.
- A periodontal assessment will be done to check the teeth's supportive structure (gums, bones)
- Following your full dental evaluation and cleaning Dr. Blankenhorn will do a thorough dental exam, an Oral Cancer Screening and a TMJ (jaw joint) evaluation

We look forward to meeting you. If you have any questions or concerns prior to your appointment, feel free to call our office at 610 683-6677.

Thank You,

Dr. James Blankenhorn and staff
